*Specification*

The amendment filed 8/14/2001 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: PV L2 VLPs, which has been added throughout the claims. Please note, L2 of a papillomavirus does not form a VLP. A PV L1 does form a VLP and a fusion of L1 and L2 form a PLV, as original claims had indicated.

Applicant is required to cancel the new matter in the reply to this Office Action.

*Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 11-14, 29-33, drawn to method of treating infection. **(Please note if this group is selected further select one virus type as now listed in claim 4, and one adjuvant as now listed in claim 31 to be examined on the merits, and amend the claims accordingly, see below for explanation)**

Group II, claim(s) 6, 8, 9, 10, drawn to method of producing PV VLP.

Art Unit: 1648

Group III, claim(s) 1, 7, drawn to method of treating infection by gene therapy.

Group IV, claim(s) 15-20, drawn to method of immunizing against HPV 11.

Group V, claim(s) 21-25, drawn to method of immunizing against HPV 6.

Group VI, claim(s) 26-28, drawn to method of treatment of existing papillomavirus infection.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I is known in the prior art as evidenced by Gupta et al ( WO 98/10790) wherein the reference teaches the invention now being claimed ( see the abstract, and the claims). The cited evidence proves that the technical feature of Group I does not make a contribution over the prior art. Thus, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2.

Upon election of Group I, Applicants are additionally required to elect element(s) identified, as indicated above as they apply to group(s). The recited element(s) identified have different structures one from other and the search for the all would be unduly burdensome. The products-utilized are made by different methods and have different uses and delineate different results, and have different effect on interaction, antigenicity and immune response. This requirement is not to be construed as a requirement for an election of species, since each of the

Art Unit: 1648

recited elements is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
